프로젝트 개요

선정 프로젝트: Velero

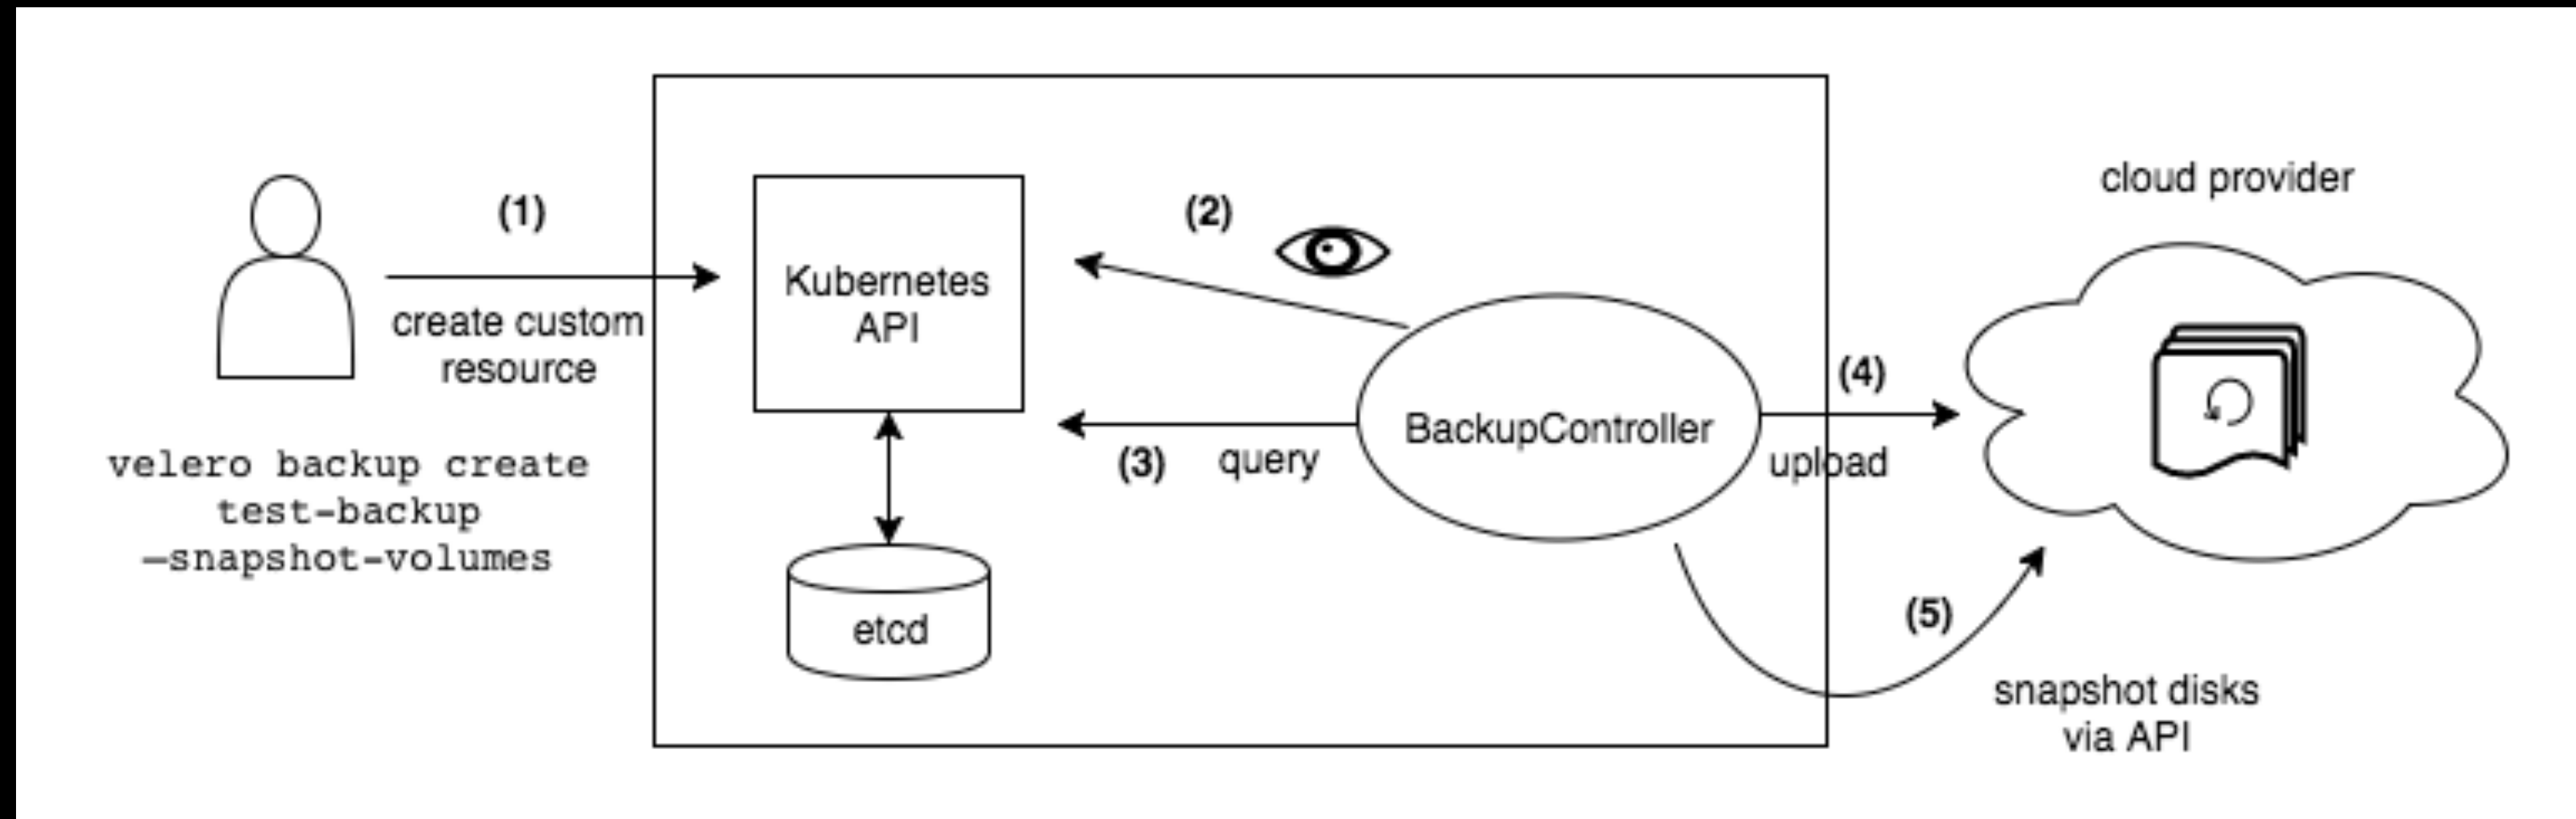

Velero는 쿠버네티스 클러스터의 리소스 및 퍼시스턴트 볼륨을 백업하고 복원할 수 있는 오픈소스 도구입니다.

- 클러스터 전체 백업 및 장애 발생 시 복원
- 클러스터 간 리소스 마이그레이션
- 프로덕션 상태를 개발/테스트 클러스터로 복제

사람의 목숨을 구해 줍니다

- 클러스터 내 서버(Operator)
- 로컬에서 사용하는 CLI 클라이언트

fix: correct parameter order in replace.sh example (node, src-drive, dest-drive)

#27

 Open kiku99 wants to merge 1 commit into minio:main from kiku99:fix-replace-script-params 

 Conversation 0  Commits 1  Checks 0  Files changed 1

kiku99 commented 2 days ago

Hi there! While using directpv as per the guide, I noticed a typo in the `replace.sh` example and the command needs to be updated for the script to work correctly. Please let me know if there are any procedures I need to follow for this PR.

Problem

In the `replace.sh` example, the parameters were shown in the wrong order:

- Incorrect: `./replace.sh sdd sdf node1`

Changes

Updated the example to match the actual script usage, with parameters in the following order:

1. Node name (`node`)
2. Source drive (`src-drive`)
3. Destination drive (`dest-drive`)

```
# Before
./replace.sh sdd sdf node1

# After
./replace.sh node1 sdd sdf
```

  Fix parameter order in replace.sh script example
